-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 December 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of the claims of Group I (claims 1-9, 20) in the reply filed on December 13, 2004 is acknowledged. The traversal is on the ground(s) that the search and examination of all claims would not place a serious burden on the Examiner. This is not found persuasive because while the search may be similar, the focus of the search and subsequent action would be searching for different structure with the discovery of different prior art as outlined by the restriction followed by either allowance or rejections based on the different structure and/or references.

The requirement is still deemed proper and is therefore made FINAL.

Claims 10-19 and 21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on December 13, 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by either Newton et al or Ghoshal. Either Newton et al or Ghoshal teach apparatus as

recited including a heat transport device having capillary action that includes within the same substrate or element condenser, evaporator and a plurality of channels through which liquid and vapor flows. In regard to claims 3-4, the material of manufacture of the assemblies of each of Newton et al and Ghoshal are disclosed as being of insulated character (for example-cols. 3-4, lines 42-67, 1-65 of Newton et al, and glass material (col. 2, lines 37-48 for example of Ghoshal). In regard to claims 5-6, both Newton et al and Ghoshal teach layered structure of the various regions including a channel section being in the center area (fig. 4 of Ghoshal for example and fig. 19 of Newton et al for example).

Allowable Subject Matter

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul J. Hirsch whose telephone number is 571-272-4927. The examiner can normally be reached on 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Mancene can be reached on 571 272-4930. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
